

REPLACEMENT NAME FOR
LYRIA MITRAEFORMIS CRASSICOSTATA DARRAGH, 1989

BY THOMAS A. DARRAGH

Natural History Division, Museum of Victoria, 285 Russell Street,
Melbourne, Victoria 3000, Australia

Abstract

Darragh, T.A., 1992. Replacement name for *Lyria mitraeformis crassicosata* Darragh, 1989. *Memoirs of the Museum of Victoria* 53: 135.

Lyria mitraeformis ovicampestris Darragh nom. nov. is erected for the junior homonym, *Lyria mitraeformis crassicosata* Darragh, 1989.

Lyria mitraeformis crassicosata was described by the author (Darragh, 1989) from the late Pliocene Roe Calcarenite, Roe Plain, Western Australia. The combination *Lyria crassicosata* has been used by Stoliczka (1867) for a species from the late Cretaceous of South India. The name of the Western Australian species is a junior primary homonym and therefore must be replaced. I am grateful to Mr G.W. Kendrick of the Western Australian Museum for drawing my attention to this homonymy.

Lyria mitraeformis ovicampestris
Darragh nom. nov.

Lyria mitraeformis crassicosata Darragh, 1989: 212, pl. 28, figs 7–12. Non *Lyria crassicosata* Stoliczka, 1867: 98, pl. 9, fig 9.
